EDUCATION

Northeastern University

Computer Science (Concentration in AI), B.S.

Aug 2025 – Apr 2029

Boston, MA

De Anza College

Dual Enrollment

Aug 2021 – Jul 2025

San Jose, CA

- Earned **60+** college credits over 4 years while in high school.
- **Middle College (2025):** Spent senior year full-time on college coursework at De Anza.

Combined Coursework: Discrete Mathematics, Differential Equations & Linear Algebra, Calculus I–III, Probability & Statistics, Data Structures & Algorithms, Program Design & Implementation, Data Visualization & Methods, Object-Oriented Programming (Java & C++), x86 Assembly Language & Architecture, Ethical Hacking, SQL Programming

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL/MySQL, HTML/CSS

Frameworks & Libraries: React, Node.js, Flask, Discord.py, NumPy, Pandas, Tailwind

AI / LLM: OpenAI GPT, Anthropic Claude, Google Gemini, Meta Llama, RAG, Embeddings, Prompt Engineering

Developer Tools: Git, Docker, AWS, GCP, PostgreSQL, Firebase, Linux, REST APIs, CI/CD, Microservices

EXPERIENCE

Founding Engineer

Storiloom

Feb 2026 – Present

Remote

- Sole engineer building a full-stack consumer product end-to-end from initial designs to production deployment, owning frontend, backend, and infrastructure.
- Designed and built backend systems end-to-end — schema design, API integrations, third-party services, and server-side logic — powering every core feature in the product.
- Partner with the founder on weekly iteration cycles, owning every engineering decision from product requirements through deploy.

Lead Developer

Lynbrook High School Job Shadow Program

Feb 2023 – Apr 2025

San Jose, CA

- Built a web platform that manages student participation in job-shadowing programs, including applications, placements, and coordination with partner organizations.
- Promoted to **Lead Developer** for the 2024–2025 session; platform served **560+** students across **115** companies.

Software Engineer Intern

Rysun Labs

Jun 2024 – Aug 2024

Milpitas, CA

- Contributed to internal AI-powered tools and production-ready web applications during a 10-week software engineering internship; selected to return as a **Data Engineer Intern** (Summer 2026).
- Designed and developed a **full-stack GenAI model comparison** platform (Flask + React.js) enabling side-by-side evaluation of OpenAI, Gemini, and Meta Llama models for fast, structured email generation.

PROJECTS

Summary Bot

Python, Discord.py, OpenAI, Google TTS, GCP, Firebase, Git

Mar 2023 – Apr 2026

- Engineered a scalable Discord bot that summarizes high-volume conversations using AI, enabling users to catch up efficiently in large, active servers.
- Deployed in **800+** Discord guilds serving **875,000+** users, with data managed via Firebase for reliability at scale.

Supportive Soul

Python, Discord.py, OpenAI, Firebase, Heroku, Git

Aug 2023

- Developed a **mental-health support Discord bot** offering on-demand resources, private AI-powered chat support, and configurable server moderation tools.

- Implemented real-time self-harm detection and response workflows, including automated message flagging, user outreach, and admin logging for safer communities.
- Awarded **2nd place** in the Mental Health category at **United Hacks 2023** for impact-driven and safety-focused design.
